### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 35-51 and 66-68 are rejected under 35 U.S.C. 102(b) as being anticipated by Cohen et al.

Cohen et al disclose cure systems for sulfur vulcanizable rubber. The cure systems are taught as comprising 0.5 to 2.0 phr sulfonamide accelerators, 1.0 to 5.0 phr of zinc oxide or zinc stearate and 0.75 to 3.0 phr sulfur-vulcanizing agents (see abstract). These amounts are seen as falling within applicants' limitations when adjusted for the total weight of the tire tread. The rubbers taught as suitable at least overlap those claimed instantly (column 4, line 52 to column 5, line 15). The sulfonamide accelerators at least overlap those claimed instantly (abstract).

The further inclusion of carbon black in amounts such as claimed instantly is taught in Table 1 while the application to the production of tire treads is taught at column 6, lines 44-61.

Applicants' arguments in traverse appear to focus on the allegation that each and every element of the instant claims is not taught by the reference since the reference does not teach applicants' claimed range with sufficient specificity. These arguments have been considered in light of applicants' declaration. While the declaration would appear to indicate improved wear resistance for zinc oxide levels of 0.6 and 0.4, these two data points alone are not sufficient to demonstrate unexpected results for the

entirety of applicants claimed range. Applicants need provide data which encompasses their entire range.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Cain whose telephone number is (571) 272-1118. The examiner can normally be reached on M-F from 10:00 to 6:00.
